DETAILED ACTION

Terminal Disclaimer

The terminal disclaimer filed on 3/12/04 disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date of 2/5/2019 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

Claims 1-7 and 12-14 are allowed.

The following is an examiner's statement of reasons for allowance: None of the cited prior art references teach or suggest a solid electrolyte capacitor comprising a dielectric film formed on a valve acting metal having pores, where in a portion of the dielectric layer is an electrically conducting polymer lamellar structure. . Additionally, the materials claimed in the prior art references fail to teach the instantly claimed properties or the pie-electron conjugated structure, doped with at least one of the instantly claimed alkoxy-substituted monosulfate anions.

Therefore it would not have been obvious to one of ordinary skill in the art at the time the invention was made to create the instantly claimed electrolyte capacitor in view of the cited prior art references.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 1751

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
